Credited for 159 Percent Revenue Growth*

Columbia, Md. – September 30, 2008 – Tresys Technology, a provider of technology and services for customers with high security requirements has been named to Deloitte's prestigious Technology Fast 50 Program for Maryland, a ranking of the 50 fastest growing technology, media, telecommunications, and life sciences companies in the area by Deloitte & Touche USA LLP, one of the nation's leading professional services organizations. Rankings are based on the percentage revenue growth over five years from 2003–2007.

"Sustaining high revenue growth over five years is an exceptional accomplishment," said Gary Tabach, Greater Washington Office Regional Managing Partner, Deloitte & Touche, LLP. "We commend Tresys for making the commitment to technology and delivering on the promise of market longevity. We are proud to honor Tresys to Deloitte's Technology Fast 50."

"We are proud to be recognized by Deloitte for our ongoing strong performance and significant increase in revenues," said Craig Sutherland, Chief Executive Officer and Co-Founder of Tresys. "I attribute Tresys' success to our dedicated team, whose engineering prowess, discipline and focus on our customers has enabled us to develop and deploy the strongest and most flexible security solutions available."

To qualify for the Technology Fast 50, companies must have had operating revenues of at least \$50,000 in 2003 and \$5,000,000 in 2007, be headquartered in Maryland, and be a company that owns proprietary technology or proprietary intellectual property that contributes to a significant portion of the company's operating revenues; or devotes a significant proportion of revenues to the research and development of technology. Using other companies' technology or intellectual property in a unique way does not qualify.

Companies from the nine regional Technology Fast 50 programs in the United States and Canada are automatically entered in Deloitte's Technology Fast 500 program, which ranks North America's top 500 fastest growing technology, media, telecommunications, and life sciences companies.
