

Tresys to Share Cyber Insights at NIWeek, Collaborates With NI on Security Strategy

COLUMBIA, Md. — July 26, 2016 — [Tresys](#) announced today it will be sharing cybersecurity insights at NI's 22nd annual [NIWeek](#) at the Austin Convention Center from Aug. 1-4 in Austin, Texas. In addition to participating at NIWeek, Tresys collaborates with NI to provide security consulting services to embedded developers working with NI's platform, enabling them to meet industrial security regulations in advanced control and monitoring applications.

"Tresys has a great relationship with NI, and we are looking forward to participating in NIWeek for the second year in a row," said Tresys CEO Robert Stalick. "From protecting and monitoring to auditing and licensing, we will continue to explore and identify how our experience, solutions and products can complement those of NI to provide the engineering community with ways to innovate better, smarter and faster."

[Art Wilson](#), vice president of technology for Tresys, will be presenting "Securing CompactRIO With NI Linux Real-Time and SELinux" on Wednesday, Aug. 3 at 4:45 p.m. in Room 16A, as part of the Embedded Systems track. Each year, NIWeek attracts more than 3,200 innovators from a wide spectrum of industries to learn about the latest technologies for software-defined systems in test, measurement and control.

With deep experience securing Linux-based systems, Tresys helps companies protect the integrity of IIoT devices. Tresys has worked with NI on the CompactRIO platform by supporting the NI Linux Real-Time SELinux policy to protect platform integrity and meet industry security requirements. Tresys develops application-specific SELinux policy and shares best practices about security strategy and policies.

About Tresys

Tresys provides customers with comprehensive security solutions that meet the challenges of the most demanding environments in the world. Whether it's safeguarding classified government networks, or ensuring the secure delivery of critical industrial, financial or operational data, clients have counted on Tresys for nearly two decades. Along with unparalleled industry expertise, Tresys' certified and accredited products protect information and ensure that the appropriate data gets to the correct location in a timely and secure manner. For more information, please go to www.tresys.com, [Facebook](#), [Twitter](#), or [LinkedIn](#).

About National Instruments

Since 1976, NI (www.ni.com) has made it possible for engineers and scientists to solve the world's greatest engineering challenges with powerful platform-based systems that accelerate productivity and drive rapid innovation. Customers from a wide variety of industries – from healthcare to automotive and from consumer electronics to particle physics – use NI's integrated hardware and software platform to improve the world we live in.
